## WOLF X-RAY PROTECTIVE APRONS

Lead equivalent protective values are approximate at 80 kvp. Wolf protective aprons are now available in 18 new fashionable colors and 2 choices of protection! Now you can match almost any dEcor, and create a more relaxing atmosphere for your patients and yourself. All aprons are now available in the new no-lead featherlight material! Our Featherlite Aprons are approximately 25% lighter than traditional Lead Aprons. Featherlite Aprons provide comparable lead equivalency protection as our standard Lead Aprons. Lead free is made from a unique composite material that absorbs X-Ray photons better than regular lead vinyl. \*Note: please place the color number (from the color choices listed below) after the apron stock number when ordering.
