## KIMBERLY-CLARK MIC, MIC-KEY INTRODUCER KIT

The pre-loaded Saf-T-Pexy gastrointestinal suture anchor system incorporates resorbable sutures and external suture locks to secure the stomach to the anterior abdominal wall. The Saf-T-Pexy system eliminates the need for traditional suture removal, minimizes the risk of infection and enhances stoma tract formation. A telescoping serial dilator system with an integrated peel-away sheath provides all-in-one, continuous dilation and easy tube placement. All-in-one dilator and peel-away sheath does not require removal or multiple exchanges prior to complete dilation and is available in various sizes to better accommodate specific patient needs. An over-the-wire stoma measuring device enables a more accurate stoma tract measurement, improving the tube fit for enhanced patient comfort and safety. Safety devices facilitate efficiency, enhance the ease of use and protect the healthcare worker from inadvertent needle sticks.

### SOUTHWEST ELASTO-GEL™ COMFORT-AID™ GEL BREAST PADS

A high glycerine content gel padding designed to help reduce nipple discomfort, improve nipple skin condition and for the management of breast and nipple injury. Unlike other hydrogel sheets and pads, Comfort-Aid™ contains 65% glycerine, 17% water and 17% polyacrylamide. Due to the high concentration of glycerine, the product exhibits bacteriostatic properties. Being bacteriostatic, the product will reduce the growth of bacteria, thus keeping the open cracks from becoming infected. With the low water content, the skin will be protected against maceration. Glycerine is a natural humectant that maintains moisture level to the skin. In addition, Comfort-Aid™ provides and maintains a moist, clean environment, is easy to use and comfortable to wear.

## BARD® 2-WAY STANDARD SPECIALTY FOLEY CATHETERS - TIEMANN

Coude-tipped catheters are used to negotiate the male urethra, particularly when a stricture is present. The Olive coude of this model features a slightly larger bulb at the tip to assist in negotiation of restrictions. Red latex offers additional stiffness that aids insertion and adds radiopacity. The 5cc balloon provides excellent seating in the bladder to minimize leakage and irritation to the trigone.

**BIRCHWOOD CYTETTE® ENDO CERVICAL SAMPLING BRUSH**

Cytette® endocervical sampling brushes have a tapered head that simplifies introduction into stenotic cervices. Soft nylon bristles increase cellular yield and improve specimen quality. 7" serrated handle rotates easily, even while wearing gloves and is marked with a blue rotation indicator to ensure precise sampling. Handle is strong and flexible yet can be snapped at any point so the brush head can be returned to a lab for special processing. Cytette dispensers contain 100 endocervical brushes. An optimal Pap specimen requires the use of both endocervical brushes and ectocervical spatulas.

## INNOVATIVE DERMASSIST™ DRY WIPES

Offers cloth-like, premium spunlace material in a dry wipe. Stronger when wet than common dry wipes made of air laid materials, these wipes are perfect for bathing and incontinent cleanup, as well as general housekeeping applications.

80-600	Premium Spunlace Dry Wipes, 13" x 9", 50/pack, 10 pk/cs
80-601	Wipes, Incontinent, Spunlace, Dry, 13" x 12", 50/pk, 20 pk/cs

## INNOVATIVE DERMASSIST™ PREMIUM WIPES

These ultra-soft spunlace washcloths are pre-moistened with our alcohol-free formula. Our premium spunlace material is less bulky and more cloth-like than other materials allowing for more thorough cleaning, particularly between skin folds. The 80-500 series comes in a low profit, easy-to-store tub or soft-pack.

80-300	Premium Spunlace, Adult, 13" x 9", 50/hard tub, 12 tub/cs
